TECHNICAL SKILLS

Languages: Python, Javascript, Html, CSS

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Machine Learning

Frameworks/Libraries: React.js, Node.js

Databases: MongoDB, PostgreSQL

Tools/Technologies: Power BI, Git, GitHub, REST APIs, VS Code

EDUCATION

Bachelor of Computer Applications (BCA)
United University

Sep 2021 - Aug 2024
Prayagraj

Achievements:
Developed projects using Python, ML, Html, CSS
Strong foundation in programming, networking, and system operations

Master of Computer Applications (MCA)
Galgotias University

Sep 2024 - Present
Greater Noida

Achievements:
I actively participated in hackathons, where I worked with my team Code X to develop innovative solutions such as a Smart Virtual Queue Management System. projects including a cardiovascular disease prediction and interactive Python applications, showcasing my proficiency in machine learning algorithms, as well as my strong grasp of OOP concepts, data structures, DBMS, and algorithms.

Intermediate (10+2)
Children’s garden school (CBSE)

Mar 2021
Bhabhua , Bihar

High School (Class 10)
Children’s garden school (CBSE)

WORK EXPERIENCE

Prodigy Infotech
Data Science intern

Aug 2025 - Sep 2025
Remote

Achievements:
During this internship, completed a Data Science internship involving data visualization, EDA, machine learning, NLP, and traffic data analysis using Python. Built predictive models, analysed real-world datasets, and delivered professional reports and presentations.

Zidio Development

Jul 2025 - Aug 2025

Achievements:

Completed a Data Science internship, working with real-world datasets to perform data preprocessing, EDA, and predictive modelling using Python (Pandas, NumPy, Matplotlib, Scikit-learn), and delivered actionable insights through machine learning solutions.

PROJECTS

AI Resume Analyzer:

Designed and developed an AI-based Resume Analyzer web application using React.js and Node.js that parses PDF resumes, performs skill extraction, and evaluates candidate profiles against predefined job roles. Implemented scoring algorithms and suggestion systems to identify missing skills and improve resume quality.

Cardiovascular Disease prediction using Hybrid Machine learning:

This project, *cardiovascular disease prediction using hybrid machine learning*, focuses on early detection of heart disease by integrating diverse medical data (biomarkers, genetics, lifestyle factors) into a hybrid machine learning model.

It uses explainable AI for transparency, reliability across populations, and bias reduction. The model aims to enhance prediction accuracy, support personalized treatments, reduce healthcare costs, and improve patient care and prevention strategies.

AI Based Mental Health Monitoring System:

Developed an AI-powered mental wellness monitoring system as a non-clinical web-based health support solution. Implemented a chatbot-based conversational interface using HTML, CSS, and JavaScript to interact with users and collect inputs for emotional evaluation. Built the backend using Node.js to process user messages and enable communication between frontend and server.

Designed logic to assess wellness indicators such as stress level, cognitive status, emotional composure, and concentration based on user responses. Integrated a web dashboard for visualization of mental health insights and trends, supporting daily wellness tracking and analysis.

COURSES

IBM Python for Data Science — IBM

Oct 2025 – Oct 2025

Achievements:

Successfully earned IBM Certificate for Data Science: Validated proficiency in Python programming, data manipulation, and visualization for data-driven insights.

CISCO CCNA: Introduction to Networks

Apr 2025 - Apr 2025

Achievements:

Successfully earned CCNA: Introduction to Networks certification (Cisco, Apr 2025), gaining strong foundational knowledge of networking concepts, IP addressing, Ethernet, and basic knowledge of network devices.
